

Public Meeting to Develop a Water Quality Cleanup Plan for the North Fork Rivanna River Watershed in Albemarle & Greene Counties

A Total Maximum Daily Load (TMDL) Cleanup Plan for the North Fork Rivanna River watershed is being developed to restore water quality due to an impairment to the benthic community and excess levels of bacteria in the watershed.

DEQ is seeking input to restore water quality in the North Fork Rivanna River watershed. Please join us for an informational meeting to offer your input and learn
