(BY APPOINTMENT)

TREE SEEDLINGS & SEEDS

CULPEPER:

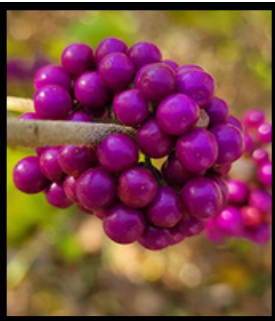

APRIL 23 (12-7PM)

APRIL 24 (9AM-12PM)

GREENE: TBA

Returning species:

Eastern redbud, Flowering dogwood, Red maple, Chestnut oak and Shortleaf pine

New Species! American Beautyberry (*Callicarpa americana*) Partial sun
Beautyberry most often grows 3-5 ft. tall and usually just as wide; it can reach 9 ft. in height in favorable soil and moisture conditions. It has long, arching branches and yellow-green fall foliage, but its most striking feature is the clusters of glossy, iridescent-purple fruit (sometimes white) which hug the branches at leaf axils in the fall and winter. The berries last well into the winter or dry season and are an important survival food for birds and other animals, though they will not eat them until other sources are depleted.

New Meadow Mix!

In addition to our usual meadow mix designed for full sun, we are pleased to also offer a mix designed for partial sun (at least six hours of sunlight). This seed mix includes Black and Brown eyed Susan, Common and Butterfly milkweed; and more! This seed mix is designed for 1,000 square feet.

New: Locally Sourced Live Stakes!

This year, we are offering a bundle of live stakes cut from mature plants at a local farm. This bundle of 25 stakes will include a mixture of species including Silky willow (*Salix sericea*), Silky dogwood (*Cornus amomum*), red-osier dogwood (*Cornus sericea*) and arrowwood (*Viburnum dentatum*).

These stakes will be cut in early March and will be available for pick up at the Culpeper office during business hours on March 10, 11 and 12 only.

<u>Item</u>	<u>Price</u>	<u>Packs</u>	<u>Item</u>	<u>Price</u>	<u>Packs</u>
