Guide to Agency Names

CBLAD: Chesapeake Bay Local Assistance Department

DCR: Department of Conservation and Recreation

DEQ: Department of Environmental Quality

DGIF: Department of Game and Inland Fisheries

DOF: Department of Forestry

DU: Ducks Unlimited

NRCS-USDA: Natural Resources Conservation Service,
U. S. Dept of Agriculture

SWCD: Soil and Water Conservation District,
Culpeper SWCD, Hanover-Caroline SWCD,
John Marshall SWCD, Northern Neck SWCD,
Three Rivers SWCD, Tidewater SWCD,
Tri-County/City SWCD

Tidewater RC&D: Tidewater Resource Conservation and
Development Council, Tappahannock, VA

USACE: U. S. Army Corps of Engineers

VCE: Virginia Cooperative Extension

VDACS: Virginia Department of Agriculture and
Consumer Services

VDH: Virginia Department of Health

VMRC: Virginia Marine Resources Commission

This booklet lists contacts that provide information on how to manage your land and water in the Rappahannock River Basin.

Rappahannock River Basin Agriculture & Forestry Workgroup

The Rappahannock River Basin Agriculture & Forestry Workgroup was created in August of 2000 at the third annual Rappahannock River Basin Summit. The workgroup was formed in an effort to address the Tributary Strategy goals set forth for the watershed. Members of the workgroup represent many different agencies including Department of Conservation & Recreation, VA Soil & Water Conservation Districts, VA Department of Game & Inland Fisheries, Natural Resource Conservation Service, VA Department of Forestry, VA Department of Health, Resource Conservation & Development, and VA Cooperative Extension; as well as interested citizens. Representation by these agencies and citizens throughout the basin allows for a much more effective and cooperative approach in reaching the goals established in the Tributary Strategy. The Agriculture & Forestry Workgroup's main goals are to develop methods of expanding the audience for conservation awareness, promote and expand BMP awareness, provide information about environmental topics and contacts in the Rappahannock River Basin, and to educate citizens in recognizing environmentally sound practices.

Rappahannock Conservation Council

The Rappahannock Conservation Council was formed in 1997 in an effort to facilitate and coordinate on-the-ground pollution reduction within the Rappahannock River Watershed. The Council strives to create a forum for basin-wide cooperation, information exchange, and partnership building among local governments, civic groups, and SWCDs. The Council is active with the implementation of the Tributary Strategy, identifying needs and issues to be addressed in order to achieve the reduction goals set forth in the Strategy. The Council is funded by a grant from the VA Department of Conservation and Recreation and consists of one board member from each of the seven Soil and Water Conservation District in the basin; Culpeper, Hanover/Caroline, John Marshall, Northern Neck, Tidewater, Three Rivers, and Tri County/City. These members bring the water quality concerns of their District to the meetings for input on how the Council may be able to assist the Districts in addressing their concerns. By having basin wide representation and input from SWCDs, citizens, and other organizations, the Council has been very effective in its efforts to reach the Tributary Strategy goals.

**Produced by the Agriculture/Forestry Workgroup of the
Rappahannock Conservation Council
The Commonwealth of Virginia supports the
Rappahannock Conservation Council Agriculture/Forestry Workgroup
through a grant provided by the
Department of Conservation and Recreation.**
